

What is Northfield SolarWorks?

Northfield **SolarWorks** is a new initiative of RENEW Northfield. We expect to act as a catalyst for the installation of many solar thermal (hot water) and solar electric (photovoltaic or PV) systems in the Northfield area in the near future.

How will it work?

RENEW Northfield will coordinate and facilitate:

- **Solar site analyses** for area homeowners and business owners, and
- **Below-market-cost bulk buying of solar thermal systems**, and savings on associated solar heating and/or PV systems.

We will work with Minneapolis solar contractor IPS Solar. IPS Solar is doing a similar bulk buy solar program in SE Minneapolis, and has attracted many interested participants.

We are submitting successful, will allow us and work with build energy-efficient affordable housing that PV, and geothermal

a grant proposal that, if to expand this program community partners to low-income and includes solar thermal, heating and cooling.

We will also be recruiting and training volunteers for the **SolarWorks Green Corps**. **Green Corps** volunteers will assist in solar installations, particularly at Habitat for Humanity and other low-income and affordable housing sites.

How do I learn more or sign up?
